ABOUT ME

Computer and Automation Engineer (MSc, 110/110), currently working as a Cybersecurity Consultant at Cluster Reply, focusing on Microsoft Security technologies.

I gained hands-on experience in enterprise cybersecurity during my internship at PRADA Group, where I contributed to security monitoring, incident analysis, and the management of Microsoft security solutions.

My master's thesis, developed around a real-world PRADA Group case study, focused on authentication security, identity protection, and the automation of security monitoring and notification processes using Microsoft Entra ID, Microsoft Sentinel, KQL, and Azure Logic Apps.

I have a strong technical background in cybersecurity, software engineering, networking, and cloud technologies, complemented by analytical thinking, problem-solving, and teamwork skills.

EDUCATION & TRAINING

27/02/2024 - 16/10/2026 - ANCONA, ITALY

MASTER'S DEGREE IN COMPUTER ENGINEERING- UNIVERSITÀ POLITECNINCA DELLE MARCHE

Master's Thesis – PRADA Group Case Study

- Analyzed enterprise authentication policies, password security mechanisms, and identity protection strategies, considering cybersecurity standards and best practices.
- Designed and validated an automated security monitoring and notification pipeline integrating Microsoft Entra Password Protection, Log Analytics, Microsoft Sentinel, KQL Analytics Rules, Automation Rules, and Azure Logic Apps.
- Performed end-to-end testing of the detection-to-notification process, from password policy violation events to automated user notifications.
- Conducted an empirical analysis of security alerts, affected users, recurring violations, and behavioral trends to evaluate the effectiveness and limitations of the implemented approach.

Technologies: Microsoft Entra ID, Microsoft Entra Password Protection, Microsoft Sentinel, Azure Monitor Logs, KQL, Azure Logic Apps, Security Automation, Identity Security.

Final grade: 110 | **Level in EQF:** 7 | **Thesis:** Authentication Policies and Mechanisms: Governance, Automation and Empirical Validation | **Website:** https://www.univpm.it/Entra/

30/07/2020 - 22/02/2024 - ANCONA, ITALY

BACHELOR'S DEGREE IN COMPUTER ENGINEERING- UNIVERSITÀ POLITECNINCA DELLE MARCHE

Level in EQF: 6 | **Website:** https://www.univpm.it/Entra/

10/09/2014 - 10/06/2020 - ANCONA, ITALY

SCIENTIFIC HIGH SCHOOL DIPLOMA- LICEO SCIENTFICO GALILEO GALILEI

Level in EQF: 4 | **Website:** https://www.liceogalileiancona.edu.it/

WORK EXPERIENCE

19/10/2026 - CURRENT - MILAN, ITALY

CYBERSECURITY CONSULTANT (C2) CLUSTER REPLY S.R.L.

- Working as a Cybersecurity Consultant within Cluster Reply, focusing on Microsoft Security solutions and cloud-based technologies.
- Contributing to technical activities related to cybersecurity, security platforms, and enterprise IT solutions.
- Expanding technical expertise in Microsoft Azure, AI agents, and AI-driven automation for enterprise and security-related use cases.
- Collaborating with technical teams in a consulting environment, combining cybersecurity expertise with software engineering and emerging AI technologies.

01/09/2025 - 28/02/2026 - MILAN, ITALY

STAGE - IT SECURITY INTERN PRADA GROUP

- Supported IT security operations by contributing to the monitoring and reduction of cyber risk across systems and infrastructure.
- Collaborated with the external SOC in the management and analysis of security alerts and IT incidents.
- Contributed to the implementation and adoption of new security tools and controls within the company environment.
- Worked with security platforms including Microsoft Sentinel, Microsoft Defender for Endpoint, and Microsoft Cloud App Security.
- Assisted with the day-to-day administration of IT systems, helping ensure service continuity, backup management, and overall system security.
- Gained experience in the integration, maintenance, and security management of IT infrastructure and its components.
- Supported the definition of infrastructure requirements and technical needs for IT systems and related components.

11/06/2018 - 30/08/2018 - ANCONA, ITALY

SCHOOL-TO-WORK ALTERNATION GIOCABENE S.R.L

Employee:

- Assisting customers in finding and choosing products for sale in the store
- Assembly of any display items
- Helping at the cash register in case of many customers

LANGUAGE SKILLS

Mother tongue(s): **ITALIAN**

	UNDERSTANDING		**SPEAKING**		**WRITING**
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	B2	B2	B2	B2	B2
SPANISH	B1	B1	B1	B1	B1

SKILLS

Cybersecurity & Microsoft Security
Microsoft Defender for Identity | Microsoft Cloud App Security | Microsoft Sentinel | Microsoft Defender for Endpoint | Microsoft Entra ID | SIEM | SIEM (Splunk) | Incident Analysis | Security Monitoring | Security Alerts | Zero Trust Security

Security Automation & Analytics
KQL | Automation Rules | Analytics Rules | Azure Logic Apps | Azure Log Analytics | Log Analytics

Programming Languages
Proxy Server (squid) | Snort (Network IDS) | JavaScript | TypeScript | Java | SQL | PHP | C/C++ | Python | Dart

Network Security & Operating Systems
Kali Linux | Linux | Windows | Squid Proxy | Network Security | Firewall Configuration | netfilter (iptables/nftables)

Software Development & Frameworks
SpringBoot | Android App Programming (Kotlin and Flutter) | Docker & docker-compose | Rasa | Nginx + Gunicorn | CSS & HTML

Artificial Intelligence & Data Science
Machine Learning | NumPy | TensorFlow | Matplotlib, seaborn | Sckit-Learn | Keras | PyTorch

Business Intelligence & Data Analytics
Microsoft Power BI | Tableau | Qlik | Data Analysis | Data Visualization

Databases
PostgreSQL | MySQL | MongoDB

Blockchain Technologies
Ethereum Blockchain | Solidity | Hyperledger Besu

Development & Productivity Tools
Git, GitHub, GitLab, Git Desktop | MATLAB | LaTex | Microsoft office/ Office 365 | Visual Studio Code

PROJECTS

GitHub Projects It's a collection of projects done during the university period and published on GitHub.
